

Junior Researcher Mentoring Programme

2023

Code:	JRMP2023_37
School / Department:	School of Nursing
Name of Research Team Member(s):	Dr Vivian Hui, Assistant Professor
Research Topic:	Exploring Help-seeking Behavior among Women with Intimate Partner Violence in Online Health Communities
Short Description of the Research Project:	<p>This project aims to explore the types of support provided and received among women with intimate partner violence experience in online health communities. We targeted a few online communities from different social media and collected a corpus of data for different social media and collected a corpus of data for analysis.</p> <p>The participating students will be responsible to annotate, categorise and analyse the online content based on the codebook provided. Analytical skills and presentation skills will be taught step-by-step during the program. They will have the opportunity to work with international scholars and researchers if their performance is satisfactory. The research group has rich experience in examining the values of online health communities with computational linguistics or text mining skills and aims at achieving impactful deliverables and publishing high-quality papers in top journals and conferences. The selected students will have the opportunity of gaining international experience through this project, and they will collaborate with international research groups in the United States.</p>
