Metal Art is a metal craftwork which is a long-established traditional silver jewelry manufacturing technique. It needs a lot of effort and patience to make a piece of jewelry from a silver wire and a silver slice. It is indeed full of challenges and fun! Let you make your favorite jewelry and experience the fun of “playing silver” in the metal art processing, it truly tests your strength and endurance. In this workshop, you can learn skills which include cutting, knocking, black silver oxidization, smoothing, sanding, and polishing.

Ms Leung Lai-shan has obtained a PMC Silver Clay Certification (Level One) from Japan, and has more than nine years of experience in holding workshops for making silver clay objects by hand.
