

Engineering

Internship Field: Biotechnology/ Engineering
Job ID: NZ002

Internship Dynamics

Location: Auckland, New Zealand

Length: 2 positions between June to August for 8 weeks

Overview on the Organisation

We believe that we are global leaders in laboratory and certain testing, such as for genomics, clinical studies and pharmacology, etc. It is a good opportunity to meet scientists and researchers from all over the world. If people are interested in biotechnology research, you will have a great chance to learn.

Intern will assist on our current research projects and gain experience during research. We are one of the leaders in environmental, food and pharmaceutical testing, agricultural science and sciences research.

Brief Duties for reference:

As an Assistant Technician Intern within the Agri Testing Business Unit, interns will be involved with a project quantifying plant available phosphate from NZ agricultural soils. Intern will help out with different testing and projects in our lab during the internship. More details can be discussed during interview.

Application Deadline

24th January 2025 (Friday)
