

Internship Field: Science/Biotechnology

Job ID: NZ017

Internship Dynamics

Location: Auckland, New Zealand

Length: 2-4 positions between June to August for 6-8 weeks

Overview on the Organisation

We have been dedicated to educating and graduating proficient chiropractors who possess a solid understanding of the fundamental practices and principles encompassing the philosophy, art, and science of chiropractic.

Duties

We are a world-class research facility driven by dedicated researchers who are leaders in the field.

Intern will be working on a project looking at the feasibility of using the App, developed by our team, Intern will have chance to work in clinics for measuring balance in older adults. Intern will be involved in collecting data for this study, which will involve recruiting participants for the study and project managing data collection in Auckland-based private clinics and analysing the data collected from the app if time permits. This will give intern experience in running and managing experimental trials aimed at maximizing clinical outcomes with technology. The role will allow intern to develop leadership and interpersonal skills.

Application Deadline

24th January 2025 (Friday)
