

ALL ABOUT SPANISH

# Internship Placements Valencia, Spain

## Internship Placements

### ARCHITECTURE

**ARCHITECTURE STUDIO**  
**DRAFTING**  
**CONSTRUCTION**

**Placement example:**

An Architecture and Design Studio born in 2008.

The architecture internship in Valencia requires work on any possible scale, from interior design to urban proposals, including industrial design. The intern must be aware of the importance of intervening and seeking synergies in the world of urban art, when carrying out their tasks.

In addition to being an Architecture and Design Studio, they also have a Construction Management arm.

The intern will work in the architecture department of the company, and will help in the development of the projects we have underway during their internship period.

**Placement example:**

This company was created in 2013 with the vision of working on brand new builds, high quality renovations, and top interior design.

They believe in a new architectural vision that looks to an ever changing, sustainable future. As architects they strive to not only communicate with the clients but identify with them, therefore enabling their ideas to be transformed into a reality through their work.

4M Arquitectos has set out on a mission to design the architecture of tomorrow, right now. To achieve our goal they combine modern and unmistakable design alongside professional project management led by a dynamic and innovative team. They have achieved success on so many projects and the high quality of our builds assures their clients they are the real deal.

### ART

**GALLERIES**

**Placement example:**

An eclectic and open space where you can see many diverse aesthetic proposals in regards to painting, sculpture, photography and more. The art on display is from both renowned and emerging artists.

Located in the heart of downtown Valencia, the gallery was established in 1999 by a curator certified in Art History and working in professional management of the Fine Arts since 1985. The gallery belongs to the Spanish Association of Art Galleries and forms part of the Committee of the Association of Art Galleries in Valencia.

They state that their mission is to work on the constant renewal of artistic proposals, collaborating closely with museums as well as public and private institutions. The gallery is succeeding in terms of their primary goals having participated in more than forty national and international fairs, consolidating their prestige and their artists.

## BIOMEDICINE/ LAB

### ENGINEERING

### R&D

### TECH

#### Placement example:

A lab that works on the development of projects related to digital manufacturing and its applications. It is also a center for training and research in the same field. It is equipped with software and manufacturing machines that allow professionals, staff, interns and university community, entrepreneurs and students, companies and organizations, to transform all the ideas and concepts into a reality and to accelerate the development of digital manufacturing.

The intern will be assigned tasks such as working and collaborating on current lab projects of the company, developing plans, making impressions of pieces in 3D, assembling different components, managing and solving issues of the project, and general maintenance of the lab itself and the instrument used.

#### Placement example:

An experienced team of professionals helping to provide a personalized oncological diagnostic service through genetic testing to its clients. They achieve this by studying each patient's case to offer solutions that adapt to their individual characteristics by improving the efficacy of their treatments and minimizing adverse effects. Their objective is to help find the most suitable genetic test for each patient in a cost-effective manner. To do this, they employ the latest genomic technologies that help them identify the molecular case and they propose the best oncological treatment. Their services include genetic counseling, clinical reports, therapies and laboratory investigations to name a few.

The intern will work directly with their supervisor, mainly observing and analyzing the techniques and therapies

employed. They will assist with clinical reports, helping to interpret results (predictive, prognostic and diagnostic biomarkers) and will record data when necessary. The intern will get to observe laboratory and imaging investigations at first hand, gaining invaluable experience in the lab and genetics field.

## BUSINESS ADMINISTRATION

### COMMUNICATIONS

### SPORTS

### STARTUPS

#### Placement example:

A fast-growing fashion company that is constantly innovating its products and improving customer service, they design jewelry with personality, both bohemian and minimalist, to wear at special events or to buy as unique gifts. They believe that quality is possible at affordable prices because every woman deserves to wear exclusive, unique jewelry items.

Tasks will include primarily supporting the Design and Product department, assisting staff in a variety of departments (Textiles, Design, Collections, Lab, Laundry), looking at processes and helping to improve them, international expansion of the brand in new markets, adapting prices and tags to market and industry indicators, forming original content and doing translations, delving into digital marketing on social media platforms and improving customer service of marketing campaigns in order to generate greater business.

#### Placement example:

A household staff recruitment agency working in the UK and Spain, as a new home care system based on the selection and management of caregivers for the elderly. They are the only company in Spain that selects their

caregivers based on their skills and emotional abilities. The aim of this company is to improve the quality of life of the elders by accompanying them with specialized caregivers for each particular situation. The team is made up of professionals from the field of psychology and social work. It is worth mentioning that the project follows a Person-Centered Attention Model where the user is the core of the intervention.

Students will need to contact businesses to create new and improve the already existing synergies, develop communication content, contact potential partners to close new alliances, keep track of client accounts...

**Placement example:**

A company where they have fun and a great time doing strategy and creativity. They enjoy projects and they take advantage of digital platforms to tell everyone about it.

Student's duties during their time with this company will involve the following, mostly related with content management and performance of a communication agency: website development, creative content creation, creative project development, social media management, campaign ads, on and off communication...

**Placement example:**

A communication agency made up of journalists with extensive experience in the sector. They have a team of highly qualified journalists and designers specialized in different sectors such as economy, sports, construction, culture or tourism. They offer comprehensive communication services, fully adapted to the needs of each company, with a proactive attitude when suggesting topics, events or strategies.

The responsibilities of the intern will include several tasks related to content creation and creativity in Social Networks and Marketing Plans. Also will have to communicate with clients, translating contents, review and develop processes, create campaigns, identify opportunities, trends and needs.

## DESIGN

**ARCHITECTURE**

**ENGINEERING**

**FASHION**

**Placement example:**

A fashion brand founded more than 30 years ago with dedication to unique products and an attention to detail have shaped the philosophy of the company.

The company conveys creativity and originality through innovation not only in design, but also in the production process. Likewise, our evolution continually explores the relationship between art and life, to create unique designs that do not neglect the functionality of the garments.

The team works together to meet the expectations of our most demanding customers. Each collection offers us a new possibility of reinvention, which allows a radical renewal of the form and content of the garments, adapting them to emerging trends, so that they reach the consumer as unique pieces full of meaning and life of their own.

Always fighting to achieve the perfect balance between design and functionality, without losing sight of the ultimate goal, to contribute to making a moment like this a little more special and memorable for our clients.

**Placement example:**

An international publication devoted to creativity, visual culture and contemporary art and design. Among its contents are subjects related to industrial design, graphic design, interior design, fashion, photography, illustration, art, architecture as well as other cross-media disciplines. They are a 100% experimental platform, which goes beyond the limits of editorial work, generating an independent environment in which different viewpoints of contemporary culture converge with up to date information. Its contents, presented in a graphically innovative layout, offer a committed vision to design with a cutting edge style.

The intern will have tasks related to graphic design and layout, they will support with content creation for the magazine, create and design audiovisual pieces, help with video editing, and edit the web page and apps.

## EDUCATION

### LANGUAGE

### NGO

### TEACHING

#### Placement example:

A private school founded in 1967 situated just a few kilometers from Valencia. The school offers bilingual Spanish and English education at pre-school and primary levels.

The intern will provide assistance in the classroom with one-on-one reading, oral presentations, individual group work, and supporting the creative subjects such as cooking, art and sports. The intern will also support children with learning difficulties. Additionally, the intern will help with classroom administration assigned by the classroom teacher, such as photocopying and classroom decoration.

#### Placement example:

A British school, through the extensive experience in the education sector of its founding team. For over 40 years, they have been dedicated to teaching in early childhood education and language learning centers, always in search of excellence, innovation, contributions of neuroscience, psychology and social science developing the very own early linguistic immersion method along the way.

In 2012, they opened a new early childhood education center, where they teach children from the early age of 4 months old onwards, and it is now, having reached the maturity of the project.

Their hope is to work to form integral human beings, with reference points, self assured and committed, who can

cope in diverse situations and adapt to the changes that are to come, ready to participate and contribute towards the formation of a better and more equitable society.

They believe in values-based education, beyond the subjects to be taught and the curricular principles. They want all their pupils to develop values such as effort, curiosity, companionship, the ability to adapt, respect, critical, creative, and collaborative thinking, etc. To strengthen the internal self of each pupil, and also their social interaction.

They have focused on education and teaching through various early childhood education centers for more than 40 years. Now through the school, they offer this experience and training to all the pupils from 3 to 18 years old.

## ENGINEERING

### ENERGY

### R&D

### TECHNOLOGY

#### Placement example:

A B2B engineering firm that provides tailor-made projects to a variety of companies in multiple sectors. They have ample experience in fabrication and development of milling machines. They develop and manufacture CNC milling machines, CNC control, and software control. They always seek to guarantee the best-quality services to customers in every stage of development taking into account the latest engineering and technology advances. The intern will be integrated into an experienced team to develop innovative projects where they will have the opportunity to participate in the different phases of the projects. The intern will be able to develop a 360° marketing strategy for the company, support the digital platform commercial interests, develop company profile and identity on numerous social media platforms, and communicate services and products to potential customers.

**Placement example:**

Spanish technological company that offers a tool that monitors concrete strength in realtime, accessible from any device with internet access, that allows construction companies to reduce costs, time and carbon emissions, thanks to the Internet of Things (IoT) technology.

**Placement example:**

Founded in 1984 this company has worked on all kinds of construction projects (studies, construction design, and construction sites) in the main area of civil engineering, including transportation systems (airports, roads, bridges, railways, metro, tramway, ports), Integral water cycles (water treatment plants and desalination plants, Environment (waste treatment, environmental impact studies, landscaping), Urbanism (Residential, building, industrial buildings, Architecture, Renewable Energies (Photovoltaic, Wind and Hydraulic) and more...

## FINANCE

**ACCOUNTING  
BUSINESS  
COMMUNICATIONS****Placement example:**

A tax, labor and accounting consultancy firm which is also part of a law office specialized in Business Law. At the office they adopt a different working approach; instead of limiting themselves to accounting and pay slips, they prefer to work closely with their clients, getting to know their business needs. By doing this their team provides optimal service while saving vast resources and maintaining a proven record of solving problems efficiently.

The intern will collaborate with the financial department's daily tasks, manage customers' project operations and report on economic markets. In general, the intern will collaborate with and assist in all different tasks with all team-members, depending on the company's current

needs, projects and client requests. Additional tasks may arise during the development of the internship.

**Placement example:**

A young company dedicated to new business development internationally.

Focused on regional partnerships, it provides tax and accounting services to the group's SME companies giving advice and communicating directly with clients, to provide tax planning services to minimize taxes in a tax compliant way, guaranteeing the best-quality services to clients in every stage of development taking into account the latest accounting and tax trends.

**Placement example:**

This company connects investors and hotel facilities. They offer investors high profitability in the acquisition of hotels and commercial centers in operation in premium tourist areas, both in the Iberian peninsula and abroad.

They have a strong point of difference against their competitors: they are efficient, diligent and manage the purchase and sale of hotels in record time.

Their management conditions are the most profitable in the market, by far, for both the seller and buyer. Many of their clients are foreign investors, which results in fast, profitable and efficient marketing of their hotels.

# HEALTHCARE

## SPECIALTY

### CLINICS

#### PHYSICAL

#### THERAPY PSYCHOLOGY

#### Placement example:

A Foundation created in 2020 with the aim to conduct research in the field of ophthalmology and vision sciences, to train future professionals in the field, and to help prevent blindness in developing countries.

The internship will take place within a clinic made up of a specialized team that uses the most advanced technology at an international level, for both the diagnosis and treatment of eye diseases.

#### Placement example:

Dental practice that specializes in dental hygiene and specific treatments. The clinic was founded by two dental teams and four private dentists, trained with specific master's degrees and holding accredited experience in their specialized fields.

Their experience covers all bases ranging from conservative dentistry, orthodontics, surgery, implantology, endodontics and periodontics.

#### Placement example:

A clinic led by a gynecologist graduated in medicine and surgery and a specialist in obstetrics and gynecology and our team with highly qualified professionals in their field ranging from nutrition, through sexuality, to physiotherapy.

They are located in Valencia and have a wide range of services for women's health, such as gynecology, obstetrics, nutrition, sexology and physiotherapy, offering personalized attention for each patient.

In this clinic they take care about the health of women in the different stages of their lives, therefore, they have a gynecological team with great experience.

#### Placement example:

A center for comprehensive health care in Valencia. The center is made up of a multidisciplinary team of specialists in physiotherapy, traumatology, podology, nutrition, psychology, and training. Thanks to the integral work of all their specialists they are able to take their patients' health to another level and thus improve their quality of life.

Starting from the base and focus on one's stride thanks to their expert podologists. They also work on training and improving one's physical abilities, improving mobility and increasing movement to make everything easier and requiring less effort. With the help of the nutritionists they are able to see health grow exponentially. Furthermore, they eliminate pain and mobility restrictions via physiotherapy care and the latest technologies utilized in the treatments. They not only focus on the body and physical rehabilitation but also on the mind to make sure their patients receive comprehensive treatment through their psychological services.

#### Placement example:

A company with clinics located in different cities across Spain. The clinic in Valencia specializes in physical therapy, dietetics, podiatry and psychology.

All the physical therapists and specialists at the clinic are qualified in these areas and also hold other specializations and additional training certificates (e.g. osteopathy, pilates, tecar therapy, etc).

Their main goal is to offer an integral and comprehensive service, exclusive and customized to improve each patient's physical and psychological health.

The clinic provides all kinds of physical therapy: general, trauma care, respiratory, rehabilitative, for youth populations, etc...

**Placement example:**

A clinic specialized in the treatment of injuries related to the locomotive system and the prevention and rehabilitation of such injuries and the treatment and rehabilitation of athletes recovering from sport injuries.

Their multidisciplinary team with certified physiotherapists, personal trainers, a podiatrist, a nutritionist and a psychologist enables them to treat a large scope of patients utilizing a variety of approaches. The whole team hold extensive experience in the treatment of all types of sports injuries and especially in the rehabilitation of Anterior Cruciate Ligament (ACL) injuries.

**Placement example:**

A comprehensive care center for adults and children who suffer from neurological problems.

This center is made up of a diverse and experienced team of multidisciplinary doctors and medical professionals. Their team is fully committed to treating patients' health and creating an organized approach to their treatment and needs. Each of their professionals provide effective care, comprehensive treatment, and care for the patient's family throughout the recovery and rehabilitation process.

They offer the best chances of success by meeting all patient needs and the needs of the family and regular caregiver too. This promotes constant coordination and adaptation to the patient and his/her treatment cycle.

They are specialists in neurology, neurosurgery, clinical psychology for adults and infants, youthful neuropsychology, neuropsychiatry, psychiatry, tobacco dishabituacion, physiotherapy and speech therapy.

**Placement example:**

The professionals at this center provide a space for consultations, therapy sessions and tools that enable clients to solve different types of problematic situations. In particular, they offer the following services: child therapy,

family therapy, couples therapy, adult therapy, sexologic consultation, group psychotherapy, bereavement groups, personal development groups, regressive hypnosis, and speech therapy.

The team is made up of psychotherapists, psychologists and speech therapists trained in different specialties and variations of psychology, education and health sciences. The team shares a humanist vision and interest in the complete development of the human being, emphasizing personal and social well-being as key factors.

**Placement example:**

A clinic that arose from the idea of breaking away from mistreatment, but not only in the mistreatment towards others, but also towards ourselves. Learning to treat oneself well is a real art, and together with the team they want to be part of that process.

They are a team of professionals with diverse backgrounds. This fact gives them a point of difference when it comes to approaching cases. They apply disciplines such as cognitive behavioral therapy, psychoanalysis, systemic therapy, coaching...

This is how they approach each case to find a solution to the patient's discomfort. Each case is supervised obtaining the best results, for the people who undertake this journey, of self-knowledge and personal growth in the clinic.

# HUMAN RESOURCES

## BUSINESS CONSULTANCY NGOs

### Placement example:

An educational institution that employs techniques related to advancements made in education via neuroscience. Here the students learn by means of emotions, deepening their memory and encouraging their creativity to create a more integrative training system. The school is very active and integrated in its surrounding community, as they strongly believe that schools are crucial for training and coexistence. Their goal is to share the educational process with families and their children, in order to successfully prepare their students with strategies competent for life.

The intern will be involved with the management and assistance to staff of an educational institution. They will undergo tasks such as managing the database of students and clients, reviewing workers files and general administration tasks, and developing company protocol concerning the integration of new employees into the system. Furthermore, creative tasks will be assigned such as developing welcome procedures as well as creating and implementing new projects.

### Placement example:

Founded in 2001, their primary aim is to increase the competitiveness of the companies they work with by optimizing their most valuable resource: people. Their mission is to provide their clients with innovative solutions in the human resources field. This company is young, innovative and proactive. Their team is both versatile and effective when it comes to achieving results in a range of fields. As well as improvements made in human resources, they strive to create organizational growth of the company, enabling all around growth and success.

The intern will assist with a whole range of projects, which may include but are not restricted to; designing training programs for companies, developing training methodology and documentation about such trainings, preparing company training programs, and attending internal meetings to prepare new projects. The intern's skills and academic background will play a role in their internship position, using their prior knowledge to support the endeavors of this ambitious team.

## IT

### ENGINEERING PROGRAMMING TECHNOLOGY

### Placement example:

A SaaS platform for industrial services in Mixed Reality through improvements to the worker through intelligent assistance. This company turns the frontline worker into a 4.0 worker, providing real-time access to all the data available in your work environment, for example, maintenance history, routes, logistics, stock, sensor data such as temperature, consumption, vibration, and more.

Their system reduces human error by monitoring day-to-day tasks using a smart system. This reduces travel for specialists by providing simple and intuitive remote support, reduces the severity of accidents at work by checking the use of PPE's in real time and reduces costs by allowing the addition of junior profiles without the need for investment in training. Furthermore, the system enables specialists from around the world to support operators in real-time on tasks that require further qualifications by sharing images, videos, documents or even 3D visuals.

The company allows you to list a worker's daily tasks, inform them of the step-by-step execution of these tasks, record all intervention, and automatically generate a report, including photos, videos, and comments. It's a new and

intelligent way to manage all company operations and make day to day tasks faster and easier.

**Placement example:**

Leader company in Europe in the production of lighting solutions with more than 1,200,000 spotlights sold every year. Focused on LED lighting for main bathroom furniture manufacturers, DIY retailers and online marketplaces. Their products and services reflect the +25 years experience in the R&D of bathroom lighting systems.

With a team made up of 230 people, they are currently operating in 26 countries around the world. Besides being the leading supplier of bathroom lighting products to the Spanish market, the company has consolidated an international presence which nowadays represents more than 50% of its total turnover.

**Placement example:**

Engineering company based in Spain dedicated to the development of hardware and software systems customized for the particular needs of each customer.

They are specialized in sensorization, predictive maintenance, process automation, predictive analysis and data management.

Their goal is to develop industrial process optimization solutions to increase the efficiency and competitiveness of companies.

Dedication, insight and a constant study of the new technologies of the sector have allowed this company to bring innovation and efficiency to the various national and international projects they have carried out.

## LEGAL

### FREELANCE LAWYERS LAW FIRMS

**Placement example:**

Boutique law firm, headquartered in Zurich and with offices in Valencia, Geneva and Barcelona that specializes in advising private clients, family offices, financial institutions and fiduciary companies on a wide range of tax and legal matters.

They are a unique law firm that focuses on providing the highest quality cross-border legal advice to help their clients navigate through the complexity of tax and wealth planning considerations involving multiple jurisdictions. All their partners are recognized experts in their fields and they are assisted by a team of highly experienced lawyers with diverse backgrounds, nationalities and legal qualifications.

**Placement example:**

Freelance lawyer, with her own law office, located in the city of Valencia, and it is part of the lawyers association of Valencia (ICAV, Ilustre Colegio de Abogados de Valencia, [www.icav.es](http://www.icav.es)).

She is a lawyer and mediator, and the office usually works cases related to criminal law (for example robberies, violence, crimes against the workers rights, fights, traffic accidents, injuries, etc.), civil law (like divorces, properties, inheritances, etc.) and labor law.

This lawyer is also a mediator, so that this law office has to take part in some issues as a mediator.

The intern will accompany the lawyer to trials, statements and all kinds of prosecutions, take part in the daily tasks, also working with the current cases, looking for the related precedent or case-law, and sentences that help to establish the right defense.

# LOGISTICS

## FINANCE STARTUPS TRADE

### Placement example:

A company founded in 1981, which currently is a leading and prestigious company in the hospitality industry and specifically, in the manufacturing of ice machines.

Their product has been introduced into new markets thus creating a commercial network around the world that we are continuing to expand.

This effort has enabled us to establish ourselves as an internationally renowned brand that remains at the forefront of technology innovation.

The students must learn and show skills such as organization, methods, consistency, motivation, patience, responsibility, teamwork, adaptability, discipline and effectiveness to work and support the product department and the market analysis staff.

### Placement example:

A global full service supplier to the automotive industry expert in managing high technical processes for automotive interiors.

Their goal is to be a benchmark for excellence in the transformation of plastic parts, generating added value to maintain the forefront in the market, and validate its trust as an essential factor in the commercial relationship. To achieve this, the company offers its clients rigor in Quality, Experience and Technology, commitment to the Environment and Personalized Attention.

The students would have the opportunity to deal with the specific project management disciplines and systems of various clients in the approval and project launch phases,

as well as in logistics management, both internal and customer projects.

### Placement example:

Marketplace that brings together all food producers in the city of Valencia. It is a web platform that connects buyers with farmers, offering a next-day home delivery service and remunerating farmers fairly.

Their goal is to be a space where consumers have access to quality, local, and sustainable products. With this, they seek to weave a network of human interactions, where fair payments are ensured with each link in the supply chain, promoting local consumption and a greater sense of community.

With this company, the farmer receives up to seven times more money per kilogram than with a traditional 'middleman'. This is possible because they eliminate intermediaries in the supply chain, and establish a fair and equal relationship between the different actors in the chain. They want to be the project that makes sustainable purchasing easier for the consumer, so that they bring about a change in consumer habits that is beneficial for the planet.

Their aim is to fairly remunerate farmers, promote local consumption and invigorate the rural economy.

## MARKETING

### ADVERTISING MEDIA STARTUPS

#### Placement example:

A Spanish football club competing in the La Liga division in Spain. The club is expanding internationally through overseas academies and partnerships, and is working on promotional materials and campaigns to achieve their expansion goals.

The intern will manage the club's new business and social media accounts, be in charge of identifying key multimedia elements concerning digital football, adapt content to international markets (mainly by identifying the correct themes to promote, cutting video clips and creating subtitles when needed) and help build a stronger networking platform with media professionals from all over the world. Business specific interns will be in charge of market research, prospective clients, industry trends analysis and contact with potential partners.

#### Placement example:

Leading property finders and relocation consultants based in the Mediterranean city of Valencia. They help foreign customers to purchase real estate in Valencia and they offer assistance and consulting throughout all aspects of the process, including property purchase, relocation, legal advice, residency, health insurance, and school finding. It is a family run business that offers very personalized and one – stop solutions to foreign clients, mostly relocating from the US.

The intern will carry out an internship program, working on the day-to-day social media of the company in a number of different areas including social profiles active and up-to-date, creating and editing visual content, blogs, and website. Also contributing to the general digital strategy and to the daily running of the company.

#### Placement example:

A pioneering company in the electric charger sector in the process of expansion.

The intern will need to learn about the product, help to develop and maintain a network of Spanish and international contacts, update and improve the website, work on the online contents to make the web appear in the first results of online research as part of their Search Engine Optimization (SEO) and also carry on with Search Engine Marketing (SEM) tasks.

## NON PROFIT ORGANIZATIONS

### EDUCATION ENVIRONMENTAL CONSERVATION SOCIAL WORK HUMAN RIGHTS

#### Placement example:

An independent, non-profit, self-governed organization dedicated to defending, promoting and protecting human rights. Their goal is to contribute toward influencing changes in attitudes and behavior within society by assessing the current situation of justice and promoting values such as peace, democracy and solidarity, both in Spain as well as in developing countries such as Africa, Asia, and Latin America. This organization provides tools and programs to people that are in difficult situations such as circumstances of inequality or those at risk of social exclusion.

The intern will organize events, help design a plan to increase donors and work in the marketing department using online platforms (campaigns through email, social media etc.). To do this they will develop and prepare projects in Logical Framework and work on the presentation of these projects to different financial supporters. Other tasks

that the intern will be required to undergo are collaborating with the International Cooperation Department concerning international projects, supporting local projects such as working with children at risk of social exclusion, taking part in the promotion and organization of events related to social awareness and training programs, and assisting with a course on children's rights and youth education.

**Placement example:**

This foundation was created with the purpose of collaborating with the marine environment.

They carry out lectures, workshops and marine clean-ups, and also participate in marine and ocean conservation projects.

They aim to create a small community where all those who love the marine environment can share information about this environment and the animals that inhabit it. To do so, they not only give visualization of their actions, but also share curiosities and information of interest with the community. In addition to this, they work to inform about projects in which the community can participate.

The organization has its own products and designs with which it reinvests in the actions, materials and projects it carries out. A percentage of all their profits goes towards helping the preservation of seas and oceans.

**Placement example:**

NGO located in neighborhoods with a large presence of immigrants, where working for and with migrants and offering both these people as the native tools for coexistence between different cultures is a success, work and live with respect and diversity. This represents an added value and innovative organizational model of integrative intervention seen as best practice within the institution itself.

They offer a level of autonomy and participation with volunteers from a philosophy of maximum aperture. Within

this team altruistic, highlight the presence of the migrants, reinforcing its integration and training as citizens/assets as a meeting space and sociability.

The internship students will work on supporting language classes and providing student support with activities and exercises, publicizing the work camps that the NGO organizes in summer in Morocco, working on materials for the work camps and posting them to all platforms, socio-labor care for immigrants, assisting at the reception and providing customer service to those who visit the center and support the administration team with daily tasks.

## PUBLIC RELATIONS

### EVENT MANAGEMENT

### MUSIC

### SOCIAL MEDIA

**Placement example:**

The best place for news in Valencia! Providing news and reviews for those living in or visiting Valencia, which was voted best city in the world for expats. What's on, restaurant and bar reviews, shopping recommendations, leisure activities and coming soon; are all features that provide subscribers with great offers and intel!

This company keeps you up to date with what's going on in Valencia. The latest sports, events and entertainment in Valencia. It gives you everything you need to live like a local in Valencia!

**Placement example:**

Floristry shop dedicated to special events and weddings. They are a young and dynamic team, working with the best wedding planners in Spain and as well as luxury brands.

The intern's tasks during the course of the internship can include marketing and promotional activities, design

of floral arrangements for weddings, setting up events, searching for new trends and popular styles in the industry, organizing photos by weddings, styles, decorations...

**Placement example:**

Company dedicated to the organization of international sporting events. We create sporting events that pursue excellence in the sporting, safety, social and business areas.

For more than 17 years they have been convinced that excellent and quality management must be based on leadership, strategy, processes, efficient use of resources and successful personnel management.

Tasks assigned to the internship student will include helping to develop an improved marketing plan working towards company objectives, proposing a brand strategy, working on online advertising, assisting with programming and posting for the company's social networks, working to implement set criteria and evaluating customer satisfaction, researching and proposing new sales channels.

## RESEARCH

**ENVIRONMENTAL  
LAB  
TECHNOLOGY  
DATA  
ANALYTICS**

**Placement example:**

A research, development and technological innovation center that works to improve the Mediterranean environment. They focus on offering comprehensive proposals for environmental management concerning the atmosphere, ecosystems, human activities and their interactions.

Their activities range from basic research to finding solutions for high priority environmental problems. They also work on the development of new technologies and applications which are set up as pilot projects so that any advancements made can be demonstrated on the management scale. Therefore, these activities are essentially pre-competitive R&D in nature. R&D activity also leads to scientific counseling tasks, with the team making contributions to environmental management policy making on various levels, from the local level to that of the European Union.

The intern will participate in experiments carried out in the high volume outdoor simulation chamber EUPHORE (European Photo Reactor). The internship placement will focus on the development and implementation of current projects, both locally and internationally. The intern will work directly with the internship supervisor assisting with research tasks and findings, testing equipment, translations, reviewing policies and managing databases.

**Placement example:**

Environmental consultancy whose mission is to show that what is good for the environment can also be good for business.

They allow to achieve, at the same time, environmental CSR performance, reduction of energy costs, brand and product differentiation.

The students will learn how to calculate the CO2 footprint of the companies and propose solutions for its reduction and compensation.

## TOURISM

### HOSPITALITY MARKETING TRAVEL

#### Placement example:

Accommodation agency specialized in providing rooms for university students and leisure services, aiming to create an unforgettable and high quality living experience for students. They are an initiative created by and for students, and that's why they are specialized in this living sector. Their overall aim is to provide students with what they need: a superb place to live and study, with nearby transport networks to improve quality of life. They strive to maintain good relations with all of their clients.

The intern will work alongside the accounting and administrative team, fulfilling various tasks related to business organization and development. Some of these tasks will include managing the meetings calendar for different department representatives, making account entries and creating invoices when necessary, gathering support documents for the supervisor's current projects, receiving training on the company's methods and systems, working with trained accountants completing weekly and monthly reports, and performing general administration tasks in a high paced startup environment.

#### Placement example:

Travel agency who organize tours and different bespoke activities, specializing in agritourism and wine tourism. They also run tours which are more focused on gastronomy and urban art.

They are a project that wants to show you the best of the city of Valencia in a different, original and funny way. They propose that you get to know the city of Valencia from several points of view, for example its magnificent gastronomy, or why not get to know the hidden parts of the city through a guided tour through the center that

explores the relationship of the Valencian character with eroticism, which is very present in its main monuments and history.

In addition, as specialists in the world of wine, they invite their clients to discover the magnificent Valencian wine routes.

## VETERINARY & ANIMAL CARE

### VET SHELTERS

#### Placement example:

Specialists in the medical assistance of domestic animals. They diagnose and treat diseases related to cardiology, dermatology, digestive, ethology, dentistry, ophthalmology, oncology, reproduction, respiratory difficulties, orthopedics and urinary systems, using advanced tools such as X-ray and ultrasound systems.

Apart from the medical activity, they also count on grooming for dogs and cats, as well as educational services that teach and control difficult behaviors in the animals.

#### Placement example:

Non-profit organization which fights for the well-being of animals abandoned in the areas of Valencia and Paterna.

The interns will be required to help to treat animals that have wounds and administer techniques to help cure them, administer medication to animals, and help in surgeries supervised by the head veterinarian if the student is interested in participating. Also supporting the team with day to day tasks, appointments, scheduling and customer service.
