

Module Component Report

Name : _____ Subject Code : _____
Student ID : _____ Module Code : _____
Programme Code : _____ Module Component : _____
Programme Title : _____
Dates of Attendance: _____

Important note: This report plays an important part in your IC subject. It is a permanent record of what **you** consider important and have learned, which includes but not limited to events occurred, observations made, and problems identified (and solved). **Plagiarism will result in module fail.**

Introduction

(Give the general overview of the module component e.g. expected learning outcomes, run-down, etc.)

Technical Content

(Describe technically ONE to TWO most important content matters you have learned in this module component, e.g. the procedures, tools & equipment used, factors affecting the quality, etc.)

Technical Content (...Continued)

Technical Content (...Continued)

Safety

(Give the outline of the safety measures taken)

Observation/Conclusion

(Describe the knowledge, skills, and experiences you have acquired and how they are related to your discipline. Suggest ways to further improve the module component)

(For Marker Only)
