*This Programme Booklet is subject to review and changes by the Department from time to time. Students will be informed of the changes as and when appropriate.*

*This document should be read together with the “Handbook for Research Postgraduate Studies” and the “Research Student Handbook” available at <https://www.polyu.edu.hk/gs/rpghandbook/>*

*Students admitted in Dual Award Programme or Joint PhD Supervision Programme should also read through the [Appendix 1 \(https://www.polyu.edu.hk/gs/rpghandbook/appendix1/\)](https://www.polyu.edu.hk/gs/rpghandbook/appendix1/) attached to the RPg Student Handbook.*

*Should any discrepancy between the contents of this booklet and University regulations arise, University regulations always prevail.*

## 1. GENERAL INFORMATION

### 1.1 Programme Titles

Master of Philosophy (MPhil)

Doctor of Philosophy (PhD)

### 1.2 Offering Department

Department of Mechanical Engineering (ME)

### 1.3 Final Awards

Master of Philosophy (MPhil)

Doctor of Philosophy (PhD)

### 1.4 Period of Study and Mode of Attendance

#### (a) Normal Period of Study

Mode of Study	MPhil (Programme Code)	PhD (Programme Code)	
		For students with Master's degree containing a significant research component	For students with a Bachelor's degree
Full-time	2 Years (43601-FTM)	3 Years (43601-FD)	4 Years (43601-FTD)
Part-time	4 Years (43601-PTM)	6 Years (43601-PD)	8 Years (43601-PTD)

#### (b) Maximum Period of Study

Mode of Study	MPhil (Programme Code)	PhD (Programme Code)	
		For students with Master's degree containing a significant research component	For students with a Bachelor's degree
Full-time	3 Years (43601-FTM)	5 Years (43601-FD)	6 Years (43601-FTD)
Part-time	5 Years (43601-PTM)	7 Years (43601-PD)	9 Years (43601-PTD)

#### For Dual PhD students admitted from the 2018/19 cohort onwards

The duration of the normal period of study in PolyU is counted from the date the student registers at PolyU instead of that at the partner institution.

## 1.5 Entrance Requirements

### (a) **General Entrance Requirements**

To register for a full-time/part-time MPhil Programme, an applicant shall normally hold a Bachelor's degree with Second Class Honours or above (or equivalent qualification) conferred by a recognised university;

To register for a 3-year full-time / 6-year part-time PhD Programme, an applicant shall normally hold an MPhil or equivalent (a research postgraduate degree with a dissertation as an award requirement) and a Bachelor's Degree conferred by a recognised university; and

To register for a 4-year full-time / 8-year part-time PhD Programme, an applicant shall normally hold:

- a Master's degree and a Bachelor's Degree; or
- a Bachelor's degree with First Class Honours (or equivalent qualification), conferred by a recognised university.

In exceptional circumstances, applicants other than those stipulated above may be permitted to register. Such applicants may be required to pass an examination.

### (b) **English Language Requirements**

The requirements for those Research Postgraduate (RPg) applicants who do not have a degree for which English was the language of instruction at a recognised university are:

- An overall score of at least 6.5 in the International English Language Testing System (IELTS); OR
- A Test of English as a Foreign Language (TOEFL) score of 80 or above for the Internet-based test.

All English language test scores are considered valid for two years after the date of the test.

## 1.6 Residence Requirements

1.6.1 Residence provides students with an opportunity to become immersed in the intellectual environment of the University. Also included in the residence are periods during which students' research requires off-campus field or non-PolyU laboratory work.

1.6.2 For students of regular RPg Programmes

The residence requirements are as follows:

Programme	Residence Requirement
2-year full-time/ 4-year part-time MPhil Programmes	2 regular semesters
3-year full-time / 6-year part-time PhD Programmes	3 regular semesters
4-year full-time / 8-year part-time PhD Programmes	4 regular semesters

Normally, the residence requirements in PolyU for Dual PhD and PolyU Joint PhD Supervision students from the 2022/23 cohort onwards are as follows:

For Dual PhD students

Programme	Residence Requirement
4-year full-time PhD Programmes	6 consecutive semesters/terms

For PolyU Joint PhD Supervision students

Programme	Residence Requirement
3-year full-time PhD Programmes	At least half of their normal study period
4-year full-time PhD Programmes	6 consecutive semesters/terms

The residence requirements may be different for individual Dual PhD and PolyU Joint PhD Supervision Programmes and students of other cohorts, subject to the prevailing agreements signed with the partner institutions. Please refer to the Research Postgraduate Student Handbook (<https://www.polyu.edu.hk/gs/rpghandbook/>) for details.

- 1.6.3 All students must fulfil the residence requirement before thesis submission.
- 1.6.4 In addition to the residence requirement, full-time students are required to be on campus full-time and consequently in such geographical proximity as to be able to participate fully in University activities associated with the programme.
- 1.6.5 Where a student needs to conduct his/her research outside Hong Kong, adequate supervision arrangements must be proposed by the Chief Supervisor and approved by the Departmental Research Committee (DRC) for study periods spent outside Hong Kong.
- 1.6.6 Leave taken by the students during their study at PolyU will be counted towards their residence requirement of PolyU.

**1.7 Leave**

- 1.7.1 With the prior agreement of the Chief Supervisor, a full-time student may take vacation leave of up to four weeks per study year.
- 1.7.2 Students' application for leave of absence shall be approved by the Chief Supervisor. All leave applications (except Unpaid leave) should be submitted with all relevant documents to the [Leave Management System](#) for approval and record.
- 1.7.3 RPg students should note that the granting of leave is not automatic. All applications should be made as far in advance as possible. Students will receive an email notification whether or not their applications have been approved after the leave application has been considered by the relevant approval authorities.

## 1.8 Confirmation of Registration

1.8.1 A successful applicant should first be registered provisionally for the degree of MPhil or PhD.

1.8.2 Students are required to have their registration confirmed, subject to a formal assessment, according to the normal deadlines as stipulated below:

Programme	Normal Deadline for Confirmation of Registration
2-year full-time MPhil Programme	At the end of the first 3 semesters/terms
3-year full-time PhD Programme	At the end of the first 5 semesters/terms
4-year full-time PhD Programme	At the end of the first 6 semesters/terms
4-year part-time MPhil Programme	At the end of the first 6 semesters/terms
6-year part-time PhD Programme	At the end of the first 9 semesters/terms
8-year part-time PhD Programme	At the end of the first 12 semesters/terms

1.8.3 Application for extension of confirmation of registration would only be considered on medical grounds. Medical proof must be attached to the application for the approval of the DRC Chair.

1.8.4 Students having their registration confirmed will be admitted to the candidacy for the MPhil or PhD degree. Students failing to have their registration confirmed by the deadline will be de-registered from the RPg Programme immediately.

1.8.5 Confirmation of Registration consists of

- Submission of a written report;
- A presentation to the Confirmation Panel and other attendees (as appropriate); and
- An oral defence of the research proposal.

## 2 RATIONALE, AIMS AND INTENDED LEARNING OUTCOMES OF THE PROGRAMME

### 2.1 University Overarching Aims of Research Degree Programmes

The research degree programmes are designed in such a way to enable the student to:

- acquire competence in research methods and scholarship; and
- display sustained independent effort and independent original thought.

### 2.2 Learning Outcomes for MPhil Programme of the Institution and Department of Mechanical Engineering

<b>Institutional Learning Outcomes for MPhil Programme</b>	<b>Intended Learning Outcomes of MPhil Programme in Department of Mechanical Engineering</b>
<p><b>Research and Scholarship Excellence</b></p> <p>MPhil graduates of PolyU should demonstrate advanced competence in research methods, possess in-depth knowledge and skills in their area of study and attain the ability to apply their knowledge and act as leaders in analyzing and solving identified issues and problems in their area of study. They should also be able to disseminate/communicate effectively their research findings in publications, conferences and classrooms.</p>	<p><b>Research and Scholarship Excellence</b></p> <p>MPhil graduates of ME should (1) demonstrate the ability to enhance and apply advanced knowledge to solve complex engineering problems; (2) develop the ability to disseminate the research outputs in a professional manner (3) prepare for advanced study (such as PhD) or for industry position.</p>
<p><b>Originality</b></p> <p>MPhil graduates of PolyU will be versatile problem solvers with good mastery of critical and creative thinking methodologies. They can generate practical and innovative solutions to problems in their area of study.</p>	<p><b>Originality</b></p> <p>MPhil graduates of ME will be versatile problem solvers with good mastery of critical and creative thinking methodologies. They can generate practical and innovative solutions to problems in their area of ME disciplines.</p>
<p><b>Lifelong Learning Capability</b></p> <p>MPhil graduates of PolyU will have an enhanced capability for continual professional development through inquiry and reflection on knowledge in their area of study.</p>	<p><b>Lifelong Learning Capability</b></p> <p>MPhil graduates of ME will have an enhanced capability for continual professional development through inquiry and reflection on knowledge in the area of ME disciplines.</p>

**2.3 Learning Outcomes for PhD Programme of the Institution and Department of Mechanical Engineering**

<b>Institutional Learning Outcomes for PhD Programme</b>	<b>Intended Learning Outcomes of PhD Programme in Department of Mechanical Engineering</b>
<p><b>Research and Scholarship Excellence</b></p> <p>PhD graduates of PolyU should demonstrate state-of-the-art expertise and knowledge in their area of study, possessed superior competence in research methodologies and contribute as leaders in creating new knowledge through analysis, diagnosis and synthesis. They should also be able to disseminate/communicate their research ideas and findings effectively and efficiently in publications, conferences and classrooms.</p>	<p><b>Research and Scholarship Excellence</b></p> <p>PhD graduates of ME should (1) exhibit the skills and knowledge to develop original ideas of significance in engineering science to analyze, understand and design intricate engineering problems; (2) develop the ability to disseminate and promote research outputs in a professional manner; (3) prepare for academic or senior position in industry.</p>
<p><b>Originality</b></p> <p>PhD graduates of PolyU will be able to think out of the box. They will be innovative problem solvers with excellent mastery of critical and creative thinking methodologies. They will create original solutions to issues and problems pertaining to their area of expertise and the society in general.</p>	<p><b>Originality</b></p> <p>PhD graduates of ME will be able to think out of the box. They will be innovative problem solvers with excellent mastery of critical and creative thinking methodologies. They will create original solutions to issues and problems pertaining in the area of ME disciplines and the society in general.</p>
<p><b>Lifelong Learning Capability</b></p> <p>PhD graduates of PolyU will demonstrate the ability to engage in an enduring quest for knowledge and an enhanced capability for continual academic/professional development through self-directed research in their area of study.</p>	<p><b>Lifelong Learning Capability</b></p> <p>PhD graduates of ME will demonstrate the ability to engage in an enduring quest for knowledge and an enhanced capability for continual academic/professional development through self-directed research in the area of ME disciplines.</p>

### 3 PROGRAMME STRUCTURE

#### 3.1 University Coursework, Language and National Education Requirements

Programme	Credit Requirements	Details
2-year full-time/ 4-year part-time MPhil	9 credits	1 credit from Academic Integrity and Ethics (AIE) + 2 credits from attending seminars + 6 credits from other subjects (no more than 3 credits from Guided-study subjects)
3-year full-time/ 6-year part-time PhD	15 credits	1 credit from Academic Integrity and Ethics (AIE) + 3 credits from attending seminars + 2 credits from Practicum + 9 credits from other subjects (no more than 6 credits from Guided-study subjects)
4-year full-time/ 8-year part-time PhD	22 credits	1 credit from Academic Integrity and Ethics (AIE) + 4 credits from attending seminars + 2 credits from Practicum + 15 credits from other subjects (no more than 9 credits from Guided-study subjects)

In addition to the above coursework/credit requirements, students are required to fulfil the English language proficiency and/or national education requirements, if applicable. Students admitted from the 2021/22 cohort onwards may be required to take additional credits (ranging from 0 to 5 credits) for the English enhancement subjects. Please refer to paragraphs 3.1.5 and 3.1.6 for details.

#### 3.2 Academic Integrity and Ethics Requirement (AIE)

Academic Integrity and Ethics (AIE) are important so students should understand the subject matters as soon as possible.

##### For students admitted from the 2024/25 cohort onwards

All RPg students admitted in and after the 2024/25 cohort are required to pass a compulsory one-credit subject on AIE within their first study year. Students should report the AIE completion status in their first annual progress monitoring exercise. If students fail to pass the AIE subject by the given timeline, they would be considered making unsatisfactory progress which may lead to de-registration.

Students may choose one AIE subject from the subject pool via the link below:

<https://www.polyu.edu.hk/gs/rpghandbook/appendix2/> that best suits their research studies. The subject pool is subject to review and change.

##### For students admitted before the 2024/25 cohort

For RPg students admitted before the 2024/25 cohort and have not yet completed ‘HTI6081 Ethics: Research, Professional and Personal Perspectives’ before Semester One of 2024/25, they are required to complete one AIE subject from the above subject pool before thesis submission. Students who have completed HTI6081 are not required to take the AIE subject.

### **3.3 Attendance at Seminar**

Full-time students are required to attend at least 10 research seminars per year, in addition to workshops/conferences, and to submit a report, to the Chief Supervisor, of no less than 1,500 words (excluding references) on one of the attended seminars every year.

Part-time students are required to attend at least 10 research seminars per two years, in addition to workshops/conferences, and to submit a report, to the Chief Supervisor, of no less than 1,500 words (excluding references) on one of the attended seminars once every two years.

Students are recommended to complete one credit per year (for full-time students) or per two years (for part-time students) to fulfil the above-mentioned requirement, with an overall assessment grade of Pass and Fail. However, as deemed appropriate by the Chief Supervisor, they are allowed to complete at most two credits per year (for full-time students) or per two years (for part-time students) to fulfil the research seminar credit requirement.

The total credits to be earned by different categories of students will be:

2-year full-time/4-year part-time MPhil programmes: 2 credits

3-year full-time/6-year part-time PhD programmes: 3 credits

4-year full-time/8-year part-time PhD programmes: 4 credits

### **3.4 Practicum**

All PhD students, irrespective of funding source and mode of study, must complete two training credits before thesis submission.

To earn one credit, students will be required to engage in teaching activities/professional service assigned by the Head of Department (HoD)/Dean of School (DoS) or his/her delegate for 6 hours/week in any 13-week semester. Students are allowed to complete these two credits any time before thesis submission. They can choose to complete these two credits in two different semesters or within the same semester, subject to the approval of the Chief Supervisor. Stipend recipients are not allowed to fulfill part of their departmental training requirement through the completion of these compulsory training credits.

Students who are required to undertake teaching supporting activities are required to complete the training programmes organised by the Educational Development Centre, English Language Centre/Chinese Language Centre (as required) before the commencement of any teaching supporting activities.

### **3.5 Guided-study subjects**

Guided-study subjects are those in which normally no lecturing is done and in which the student is required by the subject supervisor to read specified monographs and journal publications; the student and subject supervisor frequently meet to discuss the progress made by the student in the subject. The weighting assigned for coursework should be less than the weighting assigned for the examination. Coursework normally consists of assignments and presentations. Examination is compulsory and normally includes both written and oral. At the end of the semester, the student is examined by the subject supervisor and another staff member who is knowledgeable about the topic. A grade will be given in the same way as for regular taught subjects in Form GSB/27. All Guided-study subjects will be at level 6 and their code number will be between 6800 and 6999.

### **3.6 English Language Proficiency**

#### For students admitted from the 2021/22 cohort onwards

All research students are required to take the Research Language Skills Assessment (RLSA) in their first semester of MPhil/PhD study. Based on their performance of the RLSA, students will be assigned to complete zero to two English enhancement subjects (0-5 credits) before thesis submission.

RLSA sessions are offered regularly. Students are strongly advised to read the information via this link: <https://www.polyu.edu.hk/elc/assessment/rlsa/> before they enroll a test session through <https://elc.polyu.edu.hk/booking/rlsa.php>

### **3.7 National Education Requirement (Non-credit bearing subject)**

#### For students admitted from the 2022/23 cohort onwards

All research students are required to complete the National Education Requirement before thesis submission as a graduation requirement. Students are encouraged to complete the requirement as early as possible.

Details on the requirement are specified at:

<https://www.polyu.edu.hk/ous/nationaleducation/en/curriculum/research-postgraduate-programme/>

### 3.8 Programme Structure: Coursework credit and thesis requirements

#### 3.8.1 Coursework credits of 2-year full time/4-year part-time MPhil

Mode and level	Subject (number of credits)	Compulsory/ Elective	Credit
MPhil 2-year Full-time/ 4-year Part-time	National Education Requirement (0)	Compulsory	0
	ENGL6016 Advanced Academic English for Research Students: Publishing and Presenting (3) ELC6011 Presentation Skills for Research Students (2) ELC6012 Thesis Writing for Research Students (3) * Subject to the Performance of RLSA	Compulsory	0/3/5*
	AIE Academic Integrity and Ethics (1)	Compulsory	1
	ME6001 Research Seminars I (1) ME6002 Research Seminars II (1)	Compulsory	2
	ME6602 Computer Simulation Methods in Science and Engineering (3) or ME6603 Advanced Mathematics of Physics and Modern Engineering (3)	Compulsory	3
	ME6101 Advanced Theory and Methods in Vibration Analysis (3) or ME6102 Advanced Topics in Control, Acoustics, and Dynamics (3) or ME6301 Properties, Applications and Modeling of Advanced Materials (3) or ME6302 Solid Mechanics (3) or ME6404 Advanced Thermofluids (3)	Compulsory	3
	<b>Total: 9 Credits + English Enhancement Subjects (if any)</b>		

### 3.8.2 Coursework credits of 3-year full-time/6-year part-time PhD

Mode and level	Subject (number of credits)	Compulsory/ Elective	Credit
PhD 3-year Full-time/ 6-year Part-time	National Education Requirement (0)	Compulsory	0
	ENGL6016 Advanced Academic English for Research Students: Publishing and Presenting (3) ELC6011 Presentation Skills for Research Students (2) ELC6012 Thesis Writing for Research Students (3) * Subject to the Performance of RLSA	Compulsory	0/3/5*
	AIE Academic Integrity and Ethics (1)	Compulsory	1
	ME6001 Research Seminars I (1) ME6002 Research Seminars II (1) ME6003 Research Seminars III (1)	Compulsory	3
	ME6006 Practicum I (1) ME6007 Practicum II (1)	Compulsory	2
	ME6602 Computer Simulation Methods in Science and Engineering (3); or ME6603 Advanced Mathematics of Physics and Modern Engineering (3)	Compulsory	3
	ME6101 Advanced Theory and Methods in Vibration Analysis (3); or ME6102 Advanced Topics in Control, Acoustics, and Dynamics (3); or ME6301 Properties, Applications and Modeling of Advanced Materials (3); or ME6302 Solid Mechanics (3); or ME6404 Advanced Thermofluids (3)	Compulsory	3
	ME6103 Intelligent Robotic Systems (3); or ME6403 Renewable Energy Technologies (3); or Free elective subjects offered to research degree students within or outside PolyU at level 6 or above, subject to the approval of the chief supervisor.	Elective	3
	<b>Total: 15 Credits + English Enhancement Subjects (if any)</b>		

### 3.8.3 Coursework credits of 4-year full-time/8-year part-time PhD

Mode and level	Subject (number of credits)	Compulsory/ Elective	Credit
PhD 4-year Full-time/ 8-year Part-time	National Education Requirement (0)	Compulsory	0
	ENGL6016 Advanced Academic English for Research Students: Publishing and Presenting (3) ELC6011 Presentation Skills for Research Students (2) ELC6012 Thesis Writing for Research Students (3) * Subject to the Performance of RLSA	Compulsory	0/3/5*
	AIE Academic Integrity and Ethics (1)	Compulsory	1
	ME6001 Research Seminars I (1) ME6002 Research Seminars II (1) ME6003 Research Seminars III (1) ME6004 Research Seminars IV (1)	Compulsory	4
	ME6006 Practicum I (1) ME6007 Practicum II (1)	Compulsory	2
	ME6602 Computer Simulation Methods in Science and Engineering (3); or ME6603 Advanced Mathematics of Physics and Modern Engineering (3)	Compulsory	3
	ME6101 Advanced Theory and Methods in Vibration Analysis (3); or ME6102 Advanced Topics in Control, Acoustics, and Dynamics (3); or ME6301 Properties, Applications and Modeling of Advanced Materials (3); or ME6302 Solid Mechanics (3); or ME6404 Advanced Thermofluids (3)	Compulsory	3
	ME6103 Intelligent Robotic Systems (3); or ME6403 Renewable Energy Technologies (3) or Free elective subjects offered to research degree students within or outside PolyU at level 6 or above, subject to the approval of the chief supervisor.	Elective	9
	<b>Total: 22 Credits + English Enhancement Subjects (if any)</b>		

### 3.9 **Grading**

All of the subjects taken will be assigned a grade and a numeral grade point is assigned to each subject grade, as follows:

Grade	Grade Point	Description
A+	4.3	Excellent
A	4.0	
A-	3.7	
B+	3.3	Good
B	3.0	
B-	2.7	
C+	2.3	Satisfactory
C	2.0	
C-	1.7	
D+	1.3	Pass
D	1.0	
F	0	Failure

3.9.1 The grades obtained by research students on all subjects will be considered and endorsed by the Subject Assessment Review Panel (SARP) of the department offering the subject.

3.9.2 Unless specified otherwise, University's General Assessment Regulations (GAR) (available from Section C1 of <https://www.polyu.edu.hk/ar/intranet/academic-regulations/har/>) should also apply to the RPg programme.

### 3.10 **Thesis Requirements**

3.10.1 On completion of an approved programme of study and research, students must submit a thesis and defend it in an oral examination.

3.10.2 MPhil and PhD theses shall consist of the student's own work of his investigations and be integrated and coherent piece of work.

3.10.3 Students are required to complete the Coursework Credit Requirements, fulfil the English Language Proficiency and National Education Requirements before submission of their thesis for examination. All MPhil and PhD students need to complete their coursework with a qualifying GPA of 2.7 or above before submission of their thesis for examination.

### 3.11 Relationship between the Programme Outcomes and Subjects

#### 3.11.1 Doctor of Philosophy (PhD)

Programme Outcomes		AIE	ME6001 — ME6004	ME6006 — ME6007	ME6602	ME6603	ME6101	ME6102	ME6301	ME6302	ME6404	ME6103	ME6403	
	Thesis	Academic Integrity and Ethics	Research Seminar I - IV	Practicum I - II	Computer Simulation Method in Science & Engineering	Advanced Mathematics of Physics and Modern Engineering	Advanced Theory and Methods in Vibration Analysis	Advanced Topics in Control, Acoustics, and Dynamics	Properties, Applications and Modeling of Advanced Materials	Solid Mechanics	Advanced Thermofluids	Intelligent Robotic Systems	Renewable Energy Technologies	Free elective subjects offered within or outside PolyU, subject to the approval of the chief supervisor
To exhibit the skills and knowledge to develop original ideas of significance in engineering science to analyze, understand and design intricate engineering problems.	√		√	√	√	√	√	√	√	√	√	√	√	√
To develop the ability to disseminate and promote research outputs in a professional manner.	√		√	√	√	√	√	√	√	√	√	√	√	√
To prepare for academic or senior position in industry.	√	√	√	√	√	√	√	√	√	√	√	√	√	√
To be able to think out of the box and be innovative problem solvers with excellent mastery of critical and creative thinking methodologies and create original solutions to issues and problems pertaining in the area of ME disciplines and the society in general.	√	√	√	√	√	√	√	√	√	√	√	√	√	√
To be able to demonstrate the ability to engage in an enduring quest for knowledge and an enhanced capability for continual academic/professional development through self-directed research in the area of ME disciplines.	√	√	√	√	√	√	√	√	√	√	√	√	√	√

**3.11.2 Master of Philosophy (MPhil)**

Programme Outcomes		AIE	ME6001 — ME6004	ME6602	ME6603	ME6101	ME6102	ME6404	ME6301	ME6302
	Thesis	Academic Integrity and Ethics	Research Seminar I - II	Computer Simulation Method in Science & Engineering	Advanced Mathematics of Physics and Modern Engineering	Advanced Theory and Methods in Vibration Analysis	Advanced Topics in Control, Acoustics, and Dynamics	Advanced Thermofluids	Properties, Applications and Modeling of Advanced Materials	Solid Mechanics
To demonstrate the ability to enhance and apply advanced knowledge to solve complex engineering problems.	√		√	√	√	√	√	√	√	√
To develop the ability to disseminate the research outputs in a professional manner.	√		√	√	√	√	√	√	√	√
To prepare for advanced study (such as PhD) or for industry position.	√	√	√	√	√	√	√	√	√	√
To be versatile problem solvers with good mastery of critical and creative thinking methodologies. They can generate practical and innovative solutions to problems in their area of ME disciplines.	√	√	√	√	√	√	√	√	√	√
To have an enhanced capability for continual professional development through inquiry and reflection on knowledge in the area of ME disciplines.	√	√	√	√	√	√	√	√	√	√

## 4. REGULATIONS AND ADMINISTRATIVE PROCEDURES

The academic regulations governing the operation and assessment of all research degree programmes can be found in the “Research Student Handbook” available at <https://www.polyu.edu.hk/gs/rpghandbook/>. Some regulations are extracted and presented in the following sections.

### 4.1 GPA Requirement

4.1.1 All MPhil and PhD students need to complete their coursework with a qualifying GPA of 2.7 or above before submission of their thesis for examination. The award will only proceed for ratification without any outstanding subject(s) remaining ungraded and unfinalized (including subject with Pass/Fail).

4.1.2 The qualifying GPA (QGPA) is the result of the accumulated value of the subject grade point multiplied by the subject credit value divided by the total credit value for those subjects. It is computed as follows:

$$\text{Qualifying GPA} = \frac{\sum \text{Subject Grade Point} \times \text{Subject Credit Value}}{\sum \text{Subject Credit Value}}$$

- Where
- a) a. credits earned from all compulsory subjects and elective subjects (with the best grade points) will be included in the calculation of the qualifying GPA;
  - b) the following subjects will be excluded from the calculation of the qualifying GPA:
    - (i) exempted subjects
    - (ii) ungraded subjects
    - (iii) incomplete subjects
    - (iv) subjects taken after thesis submission
    - (v) subjects assessed with a “Pass” or “Fail” grade
    - (vi) subjects for which credit transfer has been approved, but without any grade assigned
    - (vii) subjects from which a student has been allowed to withdraw (i.e., those with the grade “W”).

4.1.3 Students may take more subjects than required in order to improve their GPA or in order to strengthen their knowledge.

4.1.4 Subjects taken after submission of the thesis will not contribute to the qualifying GPA.

4.1.5 Minimum number of credits with a letter grade

An MPhil student must complete at least three credits with a letter grade and a PhD student must complete at least six credits with a letter grade to allow for a meaningful calculation of the qualifying GPA.

## 4.2 Credit Transfer

4.2.1 Only credits gained from subjects at the postgraduate level with a passing mark/grade that have not been used to contribute to an award will be acceptable for transfer with the following exceptions:

4.2.2

- (a) all returning students will be allowed to transfer the grade obtained in the Academic Integrity and Ethics (AIE) subject to the new RPg programme regardless of its level, provided that the grade was attained within the validity period (see para. 4.2.3). However, credit transfer will not be granted to returning students admitted in or after 2024/25 for the credit earned from the subject “HTI6081 Ethics: Research, Professional & Personal Perspectives”;
- (b) all 3-year full-time/6-year part-time PhD students will be allowed to transfer one credit from his/her previous attendance in seminars.

4.2.3 *Credit transfer of subjects at postgraduate level earned from recognised previous studies*

Applications for credit transfer from recognised previous studies will be endorsed by the D/SRC with justifications and approved by the HoD/DoS via Form GSB/33, with the following arrangements:

	Credits previously taken		
	at PolyU	outside PolyU (for regular PhD and PolyU Joint PhD Supervision students)  outside PolyU and the partner institution (for Dual PhD students only)	at the partner institution (for Dual PhD students only)
Validity period of credits	eight years from the year of attainment at the time of admission		
Maximum number of credits transferrable	no more than 50% of the credit requirement of the RPg programme		No limit
Grade assignment	A grade shall be assigned	Only approval on the credit transfer is required. No grade shall be assigned.	A grade shall be assigned

4.2.4 *Credit transfer of subjects at postgraduate level taken outside PolyU after admission*

A student is allowed to take subjects outside PolyU during his/her studies at PolyU to gain credits if he/she obtains his/her Chief Supervisor’s prior approval. Applications for credit transfer of such subjects, including those taken by Dual PhD students at the partner institution after admission, will be endorsed by the D/SRC with justifications and approved

by the HoD/DoS via Form GSB/48. There is no limit on the number of credits to be approved for transfer. A grade shall be assigned.

- 4.2.5 The D/SRC shall assign an appropriate grade with due consideration to the academic equivalence of the subjects concerned and the comparability of the grading systems adopted by the University and the other institutions for the approval of the HoD/DoS.

For credit transfer of subjects assessed with a mark/score/grade, a letter grade shall be assigned in accordance with the grading table below. However, if the equivalent subjects in the PolyU RPg programmes for claiming the credits transferred are originally assessed with a pass/fail grade (such as Seminars), only a “Pass” grade shall be assigned.

For credit transfer of subjects assessed with a pass/fail grade, a “Pass” grade shall be assigned, regardless of whether the equivalent subjects in the PolyU RPg programmes for claiming the credits transferred are originally assessed with a letter grade or not.

Grade	Grade Point	Short Descriptions
A+	4.3	Excellent
A	4	
A-	3.7	
B+	3.3	Good
B	3	
B-	2.7	
C+	2.3	Satisfactory
C	2	
C-	1.7	
D+	1.3	Pass
D	1	
F	0	Failure

- 4.2.6 *Minimum number of credits with a letter grade*

An MPhil student must complete a least three credits with a letter grade and a PhD student at least six credits with a letter grade to allow for a meaningful calculation of the qualifying GPA.

### 4.3 **Deferment of Study**

- 4.3.1 A student may apply within the normal period of study for deferment of up to 3 semesters/terms at a time, for no more than a cumulative total of 6 semesters/terms. Deferment will not count towards the period of study. Applications for deferment shall be approved by the D/SRC via the PolyU Chief Supervisor and the Chief Supervisor of the partner institution (for Dual PhD Programme) / Co-supervisor from partner institution (for PolyU Joint PhD Supervision Programme) (if applicable)
- 4.3.2 Deferment of study, if approved, is effective from the next semester.
- 4.3.3 Students approved for deferment of study before semester commencement will be entitled to a tuition fee refund. Application for deferment of study within a semester will only be considered before the start of the examination period.

- 4.3.4 Approval for deferment after the normal period of study shall not normally be considered except on the basis of certified health problem(s).
- 4.3.5 Resumption of study should start at the beginning of a semester.
- 4.3.6 Stipends will be stopped as soon as deferment commences. Students will be required to return the stipend overpaid during the deferment period to the university. Following the resumption of study, stipends, if provided, will only be paid from the day the semester commences or from the first day of the month.

#### **4.4 Subject Registration**

- 4.4.1 Research students will register for subjects at the same time as other students. Whether a research student can add a subject will depend on the availability of vacancies in the subject and the approval of the Chief Supervisor. A student should indicate his/her selected subject in [Form GSB/26](#) for Chief Supervisor's approval before subject registration. Similarly, a student can drop a subject if it is approved by the Chief Supervisor. The student will effect the subject registration/deletion via [eStudent](#).
- 4.4.2 After the add/drop period, further enrolment of subjects will normally not be entertained. Exceptional cases with good justification and to which the subject lecturer agrees will require the D/SRC's approval up to the end of the 4th week after the commencement of the semester.

#### **4.5 Subject Withdrawal**

- 4.5.1 Dropping of subjects after the add/drop period is not allowed. If a student has a genuine need to drop a subject after the add/drop period, it will be handled as subject withdrawal. The student should submit an application for subject withdrawal to the Chief Supervisor and Subject Lecturer for approval. The withdrawn subject will be reported in the Assessment Result Notification and Transcript of Studies although it will not be counted in the calculation of QGPA.
- 4.5.2 Application for subject withdrawal will not be entertained after the commencement of the examination period.

#### **4.6 Subject Retaking**

- 4.6.1 Students may only retake a subject which they have failed (i.e. Grade F or U). The number of retakes is restricted to two (i.e. a maximum of three attempts for each subject is allowed).
- 4.6.2 The second retake of a failed subject requires the approval of the Faculty/School Board Chairman.
- 4.6.3 Students who have failed a compulsory subject after two retakes and have been deregistered can submit an appeal to the Academic Appeals Committee (AAC) for a third chance of retaking the subject. If the AAC does not approve further retakes of a failed compulsory subject or the taking of an equivalent subject with special approval from the Faculty, the student concerned would be deregistered and the decision of the AAC shall be final within the University.

- 4.6.4 In cases where a student takes another subject to replace a failed elective subject, the fail grade will be taken into account in the calculation of the GPA, despite the passing of the replacement subject.
- 4.6.5 Departments/Schools may impose more stringent regulations on the retaking of particular types of subjects, e.g. practicum, clinical placement. Students should be duly informed.

#### **4.7 Subject Exemption**

A student may be exempted from taking a compulsory subject if s/he has successfully completed a similar subject previously in another programme or if s/he already has the associated knowledge/skills via work experience, etc. Subject exemption is decided by the DRC but students can also apply for it. In order to satisfy the credit requirement, it is necessary for the student to take another subject, to be approved by the Chief Supervisor, in place of the exempted subject. Such subject will be considered as an elective subject.

#### **4.8 Study Progress**

- 4.8.1 Students shall be required to submit progress reports as required from time to time by the University
- 4.8.2 The D/SRC shall, on receipt of the report, evaluate and assess the progress of the student. In the event that the student's progress is unsatisfactory, the D/SRC is required to give details of the proposed remedial action and consider carefully whether the student should be provided with stipend and/or cash awards for the following 12 months. The case, together with the D/SRC's recommendations, shall be submitted to the GSB Chair for decision. A student may be deregistered if his/her progress is rated unsatisfactory for two consecutive times.
- 4.8.3 If a student fails to submit his/her progress report by the end of the two-month grace period, the D/SRC shall convene a meeting (no decision by circulation) to consider whether the student should be de-registered as a result of his/her unsatisfactory progress. If deregistration is not recommended, the D/SRC shall forward the explanation in writing to the GSB Chair for consideration within one month of the expiry of the grace period

#### **4.9 Deregistration**

- 4.9.1 A student may be deregistered in the following circumstances:
- a) if his/her progress is considered unsatisfactory; or
  - b) if he/she has reached the maximum number of retakes allowed for a failed compulsory subject; or
  - c) if the maximum period of study is exceeded; or
  - d) if his/her thesis is deemed unsatisfactory.
- 4.9.2 A recommendation for deregistration as a result of unsatisfactory progress may be proposed by the Chief Supervisor and approved by the DRC. The DRC Chairman cannot take action by himself/herself on this issue.
- 4.9.3 A recommendation for deregistration made by the Board of Examiners (BoE) shall be approved or rejected by the GSB.

Intended Blank

## 5. SUBJECT SYLLABI

The syllabi of subjects offered by Department of Mechanical Engineering are presented in the subsequent pages by alphabetical order of subject codes.

ME6001-4	Research Seminar I, II, III and IV
ME6006-7	Practicum I and II
ME6101	Advanced Theory and Methods in Vibration Analysis
ME6102	Advanced Topics in control, Acoustics, and Dynamics
ME6103	Intelligent Robotic Systems
ME6301	Properties, Applications and Modeling of Advanced Materials
ME6302	Solid Mechanics
ME6403	Renewable Energy Technologies
ME6404	Advanced Thermofluids
ME6602	Computer Simulation Methods in Science and Engineering
ME6603	Advanced Mathematics of Physics and Modern Engineering

Intended Blank

### Subject Description Form

<b>Subject Code</b>	ME6001 ME6002 ME6003 ME6004
<b>Subject Title</b>	Research Seminar I Research Seminar II Research Seminar III Research Seminar IV
<b>Credit Value</b>	One credit per subject
<b>Level</b>	6
<b>Pre-requisite/ Co-requisite/ Exclusion</b>	N.A.
<b>Objectives</b>	To let the students to meet with leaders of different research fields and broaden their exposure to and knowledge of latest research and technology.
<b>Intended Learning Outcomes</b>	<ul style="list-style-type: none"> <li>a. To develop substantial fundamentals and state-of-art technologies in ME discipline;</li> <li>b. To broaden their exposure to other disciplines so as to help developing in-depth understanding and specialize one or more research methodologies and techniques in ME discipline;</li> <li>c. To develop the ability to pose scientific problems in Mechanical Engineering;</li> <li>d. To develop the ability to disseminate and promote research outputs in a professional manner.</li> </ul>
<b>Subject Synopsis/ Indicative Syllabus</b>	To be arranged in line with the departmental seminars.
<b>Teaching/Learning Methodology</b>	<p>Full-time students are required to attend at least 10 research seminars per year, in addition to workshops/conferences, and to submit a report, to the Chief Supervisor, of no less than 1,500 words (excluding references) on one of the attended seminars every year.</p> <p>Part-time students are required to attend at least 10 research seminars per two years, in addition to workshops/conferences, and to submit a report, to the Chief Supervisor, of no less than 1,500 words (excluding references) on one of the attended seminars once every two years.</p> <p>The research seminars may or may not be organised by the host department and are expected to last not less than an hour each. The topic of the seminar reported on should not be related directly to the thesis title of the student.</p> <p>Chief Supervisors are required to assess the report (with a pass or failure grade). Students who failed to submit a report to the satisfaction of their Chief Supervisor are required to make a re-submission until a pass grade is obtained. The Chief Supervisor has to pass the record of the seminars attended by their students and the report with a pass grade to the Research Office for custody at the end of each academic year.</p>

	<p>Students should be awarded one credit per year (for full-time students) or per two years (for part-time students) for completing the above-mentioned requirement, with an overall assessment grade of Pass and Fail.</p> <p>The total credits need to be earned by students are listed as follows:</p> <p>The total credits need to be earned by students are listed as follows:</p> <p>2-year MPhil student needs to take Research Seminar I and II (2 credits in total)  3-year PhD student needs to take Research Seminar I, II and III (3 credits in total)  4-year PhD student needs to take Research Seminar I, II, III and IV (4 credits in total)</p>

July 14

### Subject Description Form

<b>Subject Code</b>	ME6006 ME6007
<b>Subject Title</b>	Practicum I Practicum II
<b>Credit Value</b>	1 credit per subject
<b>Level</b>	6
<b>Pre-requisite/ Co-requisite/ Exclusion</b>	N.A.
<b>Objectives</b>	This subject is compulsory for PhD students. Aims to provide teaching experience and training opportunity to research students in order to widen their exposure for the development of their academic career.
<b>Intended Learning Outcomes</b>	<ul style="list-style-type: none"> <li>a. To develop substantial fundamentals and state-of-art technologies in ME discipline;</li> <li>b. To broaden their exposure to other disciplines so as to help developing in-depth understanding and specialize one or more research methodologies and techniques in ME discipline;</li> <li>c. To develop the ability to pose scientific problems in Mechanical Engineering;</li> <li>d. To develop the ability to disseminate and promote research outputs in a professional manner</li> </ul>
<b>Subject Synopsis/ Indicative Syllabus</b>	The nature of the training shall be related to teaching and research, and be relevant to the formal programme of study.
<b>Teaching/Learning Methodology</b>	<p>The departmental training requirement for stipend recipients should be kept unchanged.</p> <p>As part of the programme requirement, all PhD students, irrespective of funding source and mode of study, <b>must</b> complete two training credits before graduation. To earn one credit, students will be required to engage in teaching/research supporting activities assigned by the HoD/DoS or his/her delegate for 6 hours/week in any 13-week semester.</p> <p>Students are allowed to complete these two credits any time before they graduate. They can choose to complete these two credits in two different semesters or within the same semester, subject to the approval of the Chief Supervisor. Stipend recipients are <b>NOT</b> allowed to fulfill part of their departmental training requirement through the completion of these compulsory training credits.</p> <p>Students who are required to undertake teaching supporting activities; are required to complete the training programmes organised by the Educational Development (EDC), English Language Centre/Chinese Language Centre (as required) before the commencement of any teaching supporting activities.</p>

<b>Assessment Methods in Alignment with Intended Learning Outcomes</b>	At the end of the training session, an assessment report on the performance of the relevant student(s), with details of activities undertaken and an overall assessment grade of Pass or Fail.	
<b>Student Study Effort Expected</b>	<p>The duties normally include:</p> <ul style="list-style-type: none"> <li>- Assistance with running of tutorials/seminars/workshops, and/or supervision of laboratory or practical work;</li> <li>- Assistance with grading of tests, assignments and examination papers;</li> <li>- Assistance with preparation of materials and resources for supporting teaching and learning;</li> <li>- Assistance with invigilation of University degree examinations; and</li> <li>- Assistance with other teaching and administrative duties, as deemed appropriate by the department.</li> </ul>	6 hours/week in any 13-week semester.
<b>Reading List and References</b>	To be advised by the subject offering lecturers.	

Revised Aug 2022

### Subject Description Form

<b>Subject Code</b>	ME6101
<b>Subject Title</b>	Advanced Theory and Methods in Vibration Analysis
<b>Credit Value</b>	3
<b>Level</b>	6
<b>Pre-requisite/ Co-requisite/ Exclusion</b>	Exclusion: ME536 Vibrations and Structure-borne Noise
<b>Objectives</b>	The subject aims: <ol style="list-style-type: none"> <li>1. To equip students with the knowledge of MDOF systems;</li> <li>2. To introduce students with elements of analytical dynamics;</li> <li>3. To introduce students with continuous models and advanced analysis methods.</li> </ol>
<b>Intended Learning Outcomes</b>	Upon satisfactory completion of the subject, students are expected to achieve the following outcomes:  <ol style="list-style-type: none"> <li>a. Able to understand and formulate the dynamic response of MDOF systems;</li> <li>b. Able to apply their knowledge of vibration theory and methods to model mechanical behavior and conduct modal analysis;</li> <li>c. Able to conduct analysis and design in sound and vibration systems with advanced analysis methods;</li> <li>d. Able to comprehend the theoretical aspects in the related literature.</li> </ol>
<b>Subject Synopsis/ Indicative Syllabus</b>	<p><b><i>Introduction to Vibrations</i></b> - Equivalent springs, dampers and masses; Nature of Excitations, and vibration about equilibrium points; Response of SDOF systems to nonPeriodic Excitations; Whirling of rotating shafts; Vibration isolation, energy dissipation and structural damping.</p> <p><b><i>Elements of Analytical Dynamics</i></b> - Degree of freedom and generalized coordinates; The principle of virtual work and D'Alembert; The hamilton's principle; Lagrange's equations.</p> <p><b><i>Multi DOF Systems</i></b> - Properties of the stiffness and Mass coefficients; Linear transformations – coupling; The eigenvalue problem; Orthogonality of modal vectors; Modal analysis.</p> <p><b><i>Continuous Models for Vibrations</i></b> - Transverse vibration of strings; Vibration of beams; Vibration of plates; Wave Equation.</p> <p><b><i>Advanced Selective Topics</i></b> - Advanced acoustics; Wave propagation and application; Nonlinear analysis methods (perturbation, harmonic balance, or Volterra series etc).</p>
<b>Teaching/Learning Methodology</b>	Lectures and Tutorials

## Subject Description Form

<b>Subject Code</b>	ME6103
<b>Subject Title</b>	Intelligent Robotic Systems
<b>Credit Value</b>	3
<b>Level</b>	6
<b>Pre-requisite/ Co-requisite/ Exclusion</b>	Prerequisite: Students should have basic knowledge of robotics and programming skills
<b>Objectives</b>	<ol style="list-style-type: none"> <li>1. To provide students with both fundamental and advanced concepts and techniques for the design, modelling, analysis of robotic systems.</li> <li>2. To provide students with the knowledge and state-of-the-art methods of intelligent robotic systems.</li> </ol>
<b>Intended Learning Outcomes</b>	<p>Upon completion of the subject, students will be able to:</p> <ol style="list-style-type: none"> <li>a. Formulate and solve robot kinematics of robotic systems.</li> <li>b. Apply advanced techniques for robotic systems.</li> <li>c. Apply the appropriate control strategy for robotic systems.</li> <li>d. Design or implement artificial intelligence solutions for robotic applications.</li> </ol>
<b>Subject Synopsis/ Indicative Syllabus</b>	<p><b>Analytical fundamentals:</b> Coordinate transformations, forward and inverse kinematics, equations of motion, modelling of non-inertial systems, trajectory planning and navigation, kinematic constraints, multi-robot coordination, feedback control, interaction force control.</p> <p><b>Advanced topics:</b> Under-actuated systems, redundancy resolution, medical and service robots, SLAM, machine learning and its applications for robotics.</p>
<b>Teaching/Learning Methodology</b>	<p>The teaching and learning methods include lectures, tutorials, homework assignment and project/experiments.</p> <p>Lectures aim at providing students with the fundamental and advanced knowledge required for understanding and analysing different robots, including system modelling, trajectory planning, control and artificial intelligence techniques.</p> <p>Tutorials aim at enhancing students' analytical and problem-solving skills on robotics.</p> <p>The project/experiment aims to have knowledge of computer simulations and hand-on experience on robot control.</p>

Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)

### Subject Description Form

<b>Subject Code</b>	ME6301
<b>Subject Title</b>	Properties, Applications and Modeling of Advanced Materials
<b>Credit Value</b>	3
<b>Level</b>	6
<b>Pre-requisite / Co-requisite/ Exclusion</b>	N.A.
<b>Objectives</b>	To provide students with theories, properties, applications and modeling methods of advanced composite materials, smart materials, and nano-materials.
<b>Intended Learning Outcomes</b>	<p>Upon completion of the subject, students will be able to:</p> <ol style="list-style-type: none"> <li>a. understand the mechanics of advanced composite materials, especially the mechanics of a lamina and laminates, including failure mechanisms;</li> <li>b. possess the state-of-the-art knowledge on smart materials and smart structure design;</li> <li>c. recognize the importance of nano-materials in advanced technology; and</li> <li>d. understand the applications of advanced composites, smart materials and nano-materials.</li> <li>e. understand advanced theories in mechanics of solids.</li> </ol>
<b>Subject Synopsis/ Indicative Syllabus</b>	<p><b><i>Advanced Composite Materials</i></b> - Composite constituents; principles of fibre-reinforced composites; mechanics of a lamina; mechanics of laminates, tooling and manufacturing processes; failure criteria for composites; design issues.</p> <p><b><i>Selected Topics of Advanced Theories in Mechanics of Solids</i></b> - such as Theory of Plasticity, Theory of Fracture Mechanics.</p> <p><b><i>Piezoelectric Materials</i></b> - The fundamental mechanisms of piezoelectric materials and major applications, Curie temperature, concept of piezoelectric moduli and applications of these moduli in design of sensors and actuators, smart structure design issues.</p> <p><b><i>Shape Memory Alloys (SMA)</i></b> - Phenomena &amp; mechanisms of temperature controlled shape memory effect, critical temperatures, stress effect on critical temperatures, mechanical properties of SMA at different phases and temperatures, shape memory and superelasticity, modeling of the effects of temperature and stress, special design considerations at joints, continuum vs. discrete applications of SMA, major applications of SMA.</p> <p><b><i>Nanomaterials</i></b> - properties, applications and modeling of nano-materials.</p> <p><b><i>Laboratory Works:</i></b></p> <ul style="list-style-type: none"> <li>• Mechanical properties of shape memory alloys.</li> <li>• Strain measurement of composite structures using embedded fibre-optic sensors.</li> </ul>

<b>Teaching/Learning Methodology</b>	1. The teaching and learning methods include lectures/tutorial sessions, homework assignments, test, mini-project or case study and examination.					
	2. The continuous assessment and examination are aimed at providing students with integrated knowledge required for advanced materials and structural design.					
	3. Technical/practical examples and problems are raised and discussed in class/tutorial sessions.

## Subject Description Form

<b>Subject Code</b>	ME6302
<b>Subject Title</b>	Solid Mechanics
<b>Credit Value</b>	3
<b>Level</b>	6
<b>Pre-requisite/ Co-requisite/ Exclusion</b>	Prerequisite: Students should have basic knowledge in Calculus, Linear Algebra, Engineering Materials, and Mechanics of Materials.
<b>Objectives</b>	To provide students with knowledge of mathematical treatments of small and large deformation, constitutive relations, elasticity, plasticity, fracture mechanics.
<b>Intended Learning Outcomes</b>	Upon completion of the subject, students will be able to: <ul style="list-style-type: none"> <li>a. Understand the mathematical treatment of linear and non-linear mechanical behaviour of materials.</li> <li>b. Understand the broad applications of advanced theories in various engineering problems.</li> <li>c. Recognize the frontier of research in solid mechanics.</li> </ul>
<b>Subject Synopsis/ Indicative Syllabus</b>	<p><b>Elasticity:</b> Stress and strain in 3D space and their tensor representations, theory for small deformation and large deformation, tensor analysis, viscoelasticity, rubber elasticity, contact mechanics, micromechanics.</p> <p><b>Plasticity:</b> Yield criteria, Convexity of yield surface and the associated flow rule, Bauschinger effect and back stress, Incremental theories of plasticity, Slip-Line Field Solutions, Crystal plasticity.</p> <p><b>Fracture Mechanics:</b> Stress intensity factor <math>K</math>, Energy release rate, Griffith theory, criterion for brittle materials, J-Integral.</p> <p><b>Finite element modelling:</b> Constitutive models and user subroutine, Implicit and Explicit methods.</p>

<p><b>Teaching/Learning Methodology</b></p>	<ol style="list-style-type: none"> <li>The teaching and learning methods include lectures, laboratory sessions, homework assignments, test, mini-project, and examination.</li> <li>The continuous assessment and examination are aimed at providing students with integrated knowledge required for advanced topics in solid mechanics.</li> <li>Technical/practical examples and problems are raised and discussed in class.</li> <li>The mini project could be a numerical simulation project or literature survey on a given topic.</li> </ol>

## Subject Description Form

<b>Subject Code</b>	ME6603
<b>Subject Title</b>	Advanced Mathematics of Physics and Modern Engineering
<b>Credit Value</b>	3
<b>Level</b>	6
<b>Pre-requisite/ Co-requisite/ Exclusion</b>	Prerequisite: Fundamental knowledge on single-variable and multi-variable calculus.
<b>Objectives</b>	<p>The subject aims at:</p> <ol style="list-style-type: none"> <li>1. To equip students with advanced concepts, definitions and theories of linear algebra and matrices, complex analysis and transformations, ODEs and PDEs.</li> <li>2. To introduce students with advanced knowledge of engineering mathematics to various classical problems in mechanical engineering.</li> </ol>
<b>Intended Learning Outcomes</b>	<p>Upon satisfactory completion of the subject, students are expected to achieve the following outcomes:</p> <ol style="list-style-type: none"> <li>a. Understand and relating concepts of linear algebra and matrices, and be able to illustrate them using examples in their research area.</li> <li>b. Use the taught theories/methods to solve ODEs and PDEs from mathematical physics.</li> <li>c. Describe the main properties of the analytic functions and transformation methods and understand their potential applications.</li> <li>d. Relate the knowledge of advanced engineering mathematics to their research topics.</li> </ol>
<b>Subject Synopsis/ Indicative Syllabus</b>	<ol style="list-style-type: none"> <li>1. <b>Linear algebra and matrices:</b> (a) Finite dimensional transformation and matrix representations: rank, null space, inner products, adjoints, determinants, <math>Ax=b</math>. (b) Eigen-problems <math>Av=\lambda v</math>: similarity transformations, diagonalization and Jordan forms. (c) Symmetric, Hermitian, orthogonal and unitary matrices; spectral decomposition. (d) Schur's theorem, Gershgorin's theorem, singular value and L-U decomposition.</li> <li>2. <b>ODEs:</b> (a) ODE theory: existence, uniqueness, dependence on initial data. (b) Initial value problems for linear ODEs, fundamental solution matrices and matrix exponentials; non-linear ODEs and linearization. (c) Boundary value problems, Green's functions for ODEs. (d) Green's functions for PDE boundary value problems, Poisson's equation.</li> <li>3. <b>Complex variables:</b> (a) Elementary functions, analytic functions, linear integrals and Cauchy's integral formula, Taylor and Laurent series, singularities and residues, Cauchy's residue theorem and contour integrations. (b) Conformal mapping.</li> <li>4. <b>PDEs:</b> (a) Linear, quasilinear and nonlinear PDE; classifications of 2<sup>nd</sup> order linear PDE: hyperbolic, parabolic and elliptic equations. (b) Methods</li> </ol>

	of solutions: separation of variables, Fourier and Laplace transform methods, travelling waves.																																
<b>Teaching/Learning Methodology</b>	<p>This subject will be taught via lectures, tutorials, mini-projects and case studies.</p> <p>Tutorials, mini-projects and case studies will be conducted in small groups to facilitate discussions.</p>																																
<b>Assessment Methods in Alignment with Intended Learning Outcomes</b>	<table border="1"> <thead> <tr> <th rowspan="2">Specific assessment methods/tasks</th> <th rowspan="2">% weighting</th> <th colspan="4">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th> </tr> <tr> <th>a</th> <th>b</th> <th>c</th> <th>d</th> </tr> </thead> <tbody> <tr> <td>1. 2. Examination	40%	√	√	√																													
Total	100%																																
<p>Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:</p> <p>Overall Assessment:  <math>0.40 \times \text{End of Subject Examination} + 0.60 \times \text{Continuous Assessment}</math></p> <p>Examination is adopted to assess students on the overall understanding and the ability of applying the concepts. It is supplemented by continuous assessment including assignments, closed-book tests and projects. The continuous assessment is aimed at enhancing the students' comprehension and assimilation of various topics of the syllabus. Continuous assessment will also be used to assess the students' capacities of self-learning and problem-solving and effective communication skill in English so as to fulfill the requirements of being a qualified PhD student.</p>																																	
<b>Student Study Effort Expected</b>	Class contact:																																
	• Lecture	39 Hrs.																															
	Other student study effort:																																
	▪ Precepts or Tutorials	32 Hrs.																															
	▪ After-class reading	34 Hrs.																															
	Total student study effort					105 Hrs.
