## Job Description

### Job Highlights:

**Hands-On Quality Assurance Experience** – Gain practical experience in quality assurance processes, including inspection, testing, and compliance with product specifications for smart device enclosures.

**Collaboration with Cross-Functional Teams** – Work alongside professionals from various departments to ensure seamless integration of quality assurance processes into product development and manufacturing.

**Exposure to Industry-Leading Technology** – Participate in projects with world-renowned clients, learning about the latest advancements in quality assurance techniques and tools. Working location: Hui Zhou, Mainland China

### Job Description:

**Quality Assurance and Testing** – Assist in the development and execution of quality assurance processes, including product testing, inspection, and validation to meet client specifications.

**Data Analysis and Reporting** – Analyze quality data, identify trends, and prepare reports to highlight areas for improvement in the manufacturing process.

**Cross-Functional Collaboration** – Work with cross-functional teams, including R&D, production, and project management, to ensure quality standards are integrated throughout the product lifecycle.

**Problem-Solving and Troubleshooting** – Identify and troubleshoot quality issues during production, proposing and implementing corrective and preventive actions.

**Documentation and Compliance** – Prepare technical documentation, including quality control plans, inspection reports, and compliance certifications.

**Support Senior Engineers** – Assist senior quality engineers in fulfilling project requirements and ensuring products meet customer expectations.

Working Hour : Week: Monday – Friday, Time: 9:00 am – 6:00 pm
