Bagtrotter Limited is an international company that has more than twenty years' experience in the bags industry with offices in Hong Kong, China, and France. While our core business is development in various ODM/OEM products for the European market, we also have our own in-house brands that sell worldwide.

We are now looking for a junior textile engineer. This textile engineer will be responsible for portions of the supply chain management, research development, and sustainability efforts of the textile department. In this role the junior textile engineer will be required to work with multiple teams such as the sales, QA/QC, and production team to help analyze, and advice best case solutions or options for current and future projects.

The person must be a self-starter and a team player, with ability to execute and initiate work with little to moderate supervision. They must possess proven communication skills and be confident to coordinating with team members. You will report to various Project Managers.

#### Key Responsibilities:

- Support sales and production teams with case studies on different materials and their benefits to the given project from both a financial and sustainable perspective
- Implement a catalogue or database of different materials and supply chains the company already uses
- Research and provide insight to new or emerging materials which may be useful to the company
- Independently oversee small projects, co-ordinating with various different teams

#### Languages:

- Must be proficient in English; fluent in Cantonese / Mandarin

#### Additional Information:

1. Working Period  
Not fixed depend on performance as we can keep this position as long time
2. Duty Days : 2-3 days per week  
Working Hours : either in the morning/afternoon quite flexible
3. Working Location : Sheung Wan
4. Target Commencement Date : As soon as possible
5. Application Method : stella.lee@landa.hk
6. Salary : Negotiated
