Service Project																
What will students do to serve?	<p>Service learning projects involving real-world service recipients who will be 1) organized through special schools for the people with disabilities, hostels for older people, NGOs and other rehabilitation related organizations (hostel-oriented projects); or 2) identified by the students from their family members and neighbors who are in need of assistive technologies/products (home-/community-oriented projects). During direct service rendering, students will be working in groups to tackle a specific need of the service recipient that is presented to them or identified by them. Students then will utilize their learned skills to evaluate the situation and propose a solution. Whenever feasible, the students will construct the assistive device for the user. Examples of the projects include designing and manufacturing a device to facilitate daily activities; accessing computer; playing a musical instrument, etc. The outcome of these projects can also include conceptual designs of a complex device or a working prototype.</p>
