

RangeVision Smart

Smart - is a new personal **3D scanner** from **RangeVision**, which is great for objects of different size ~ from 4cm to 1meter. It is compact, easy calibrated and makes accurate and highly detailed scans.

Smart contains **2** industrial cameras, that enables to scan with markers for automatically aligning and simplifying the scanning process.

The scanner is **easy** to calibrate as it contains no lens.

This low-cost solution fits perfectly for a variety of industries such as:

- Design
- Classrooms (Education)
- Small enterprise
- Persons who are keen on 3d printing and 3D scanning

Variant colours are available:
