

University Research Facility in Life Sciences

The Hong Kong Polytechnic University

NGS Service Policy

1. This service is for Research Use Only, not for Diagnostic Use.
2. ULS accepts individual tubes of single library or library pool.
3. Library preparation should be carried out by the user. Please consult the staff-in-charge about sample requirements and sample preparations.
4. ULS does not accept any potentially biohazardous samples (*i.e.*, biological samples of risk group 2 or above).
5. Index information in the library/library pool must be included in the library submission form.
6. ULS provides base calling analysis and delivers sequencing results in BCL or FASTQ formats.
7. Any leftover sample materials will be discarded after the service run unless otherwise stated in the NGS library submission form.
8. Avoid any sensitive personal information when labelling the sample IDs.
9. Sequencing price varies with different factors, such as sequencing reads or base output, read type and read length, applications, number of samples, etc. Please contact the staff-in-charge for discussion and service quote.
10. Please refer to the following flowchart for an overview of our NGS service.
